It includes: Scoring carriage Art.6380, SIRI GUIDE Art.17330GC, plier for splitting Art.16500 and case Art.6300-VS.

SMART CUT is a system for cutting Igres porcelain slabs. It consists of a sliding carriage with a 13 mm Ø wheel for cutting and pliers for separating. SMART CUT is to be used on his aluminium guide. Thanks to four pvc ball bearing pulleys, SMART CUT slides smoothly along his guide. You have to slightly press on the knobs for an easy cut. The pliers included to separate the tiles after the score, can be adjusted for a thickness up to 10 mm.
